

## Team 2 (Angry birds)

Saviours of the Tech!!!

Shoot the Angry birds to save the Technologies out of the cage and by answering the coding or tech based questions based on that Technology.

Besides using  (pig) as our ultimate target, we will use symbols of technologies

like snake symbolising python,  for

android,  logo of swift language etc. and on targeting a particular one, a question will pop up according to that language/technology.

5-6 levels will be created in increasing difficulty. Maximum 4 Angry bird chances will be given in a level. Less the chances you take, more will be your score.
